TOXICOLOGY

SUBJECT INDEX

Volume 43 (1987)

Acetylation
food mutagen, heterocyclic amines, rat metabolism, demethylation, 193
Acute cadmium toxicity
ascorbic acid, zinc, metallothionein, mouse, 251
Aflatoxin B_1
immunotoxicity, lymphocyte proliferation, immunosuppression, lymphocyte cultures, 123
Alkoxyacetic acids
glycol ethers, testis, spermatocyte, 17
Alkylformamides
differentiation, inducers, 239
Aminoglycoside antibiotics
gentamicin, developing kidney, 301
Ascorbic acid
zinc, metallothionein, acute cadmium toxicity, mouse, 251

Basement membranes
nephrotoxicity, glomerulus, cation binding, metals, nickel, 1
Benzimidazole-derivative
triclabendazole, teratogenicity, 283
Benzimidazole-derivative
flubendazole, teratogenicity, 133
Benzo[*a*]pyrene
cytochrome *P*-450, induction, catallyzed activities, polychlorinated biphenyls, mouse lung, mouse liver, 315
Bioactivation of MPTP
mutagenicity, iminium ion, 173
Brain Na^+, K^+-ATPase
L-T_3 treatment, mature rat, 75
Butylated hydroxyanisole (BHA)
metabolism, rat, excretion, organ distribution, 139
Butylated hydroxyanisole
N-nitrosodi-*n*-butylamine, nitrosation, rat, 217

Cardiovascular system
lead poisoning, carotid sinus, rats, 161
Carotid sinus
lead poisoning, cardiovascular system, rats, 161
Cation binding
nephrotoxicity, glomerulus, basement membranes, metals, nickel, 1
Cell-mediated immune response
O,S,S-trimethyl phosphorodithioate, immunomodulation, humoral immune response, 201
Chemotherapy
N-methylformamide, sodium ascorbate, menadione sodium bisulfite, pyridoxal hydrochloride, diminished toxicity, leukemia P 388, M 5076 sarcoma, 183
Chlorambucil
renal function, developmental, toxicity, rat, neonatal, 51
Coefficient of variation
rat toxicity studies, false negative error rate, 65
Cytochrome *P*-450
induction, catalyzed activities, polychlorinated biphenyls, benzo[*a*]pyrene, mouse lung, mouse liver, 315

Developmental toxicity
renal function, rat, neonatal, chlorambucil, 51
Dimethylamine
trimethylamine, 117
Demethylation
food mutagen, heterocyclic amines, rat metabolism, acetylation, 193
Developing kidney
aminoglycoside antibiotics, gentamicin, 301

Diethylnitrosamine
O^6-ethylguanine, hamsters, pulmonary cells, 289
Differentiation
alkylformamides, inducers, 239
Dimethylformamide
solvent, hepatotoxicity, 231
Diminished toxicity
N-methylformamide, sodium ascorbate, menadione sodium bisulfite, pyridoxal hydrochloride, chemotherapy, leukemia P 388, M 5076 sarcoma, 183

O^6-ethylguanine
diethylnitrosamine, hamsters, pulmonary cells, 289
Excretion
metabolism, butylated hydroxyanisole (BHA), rat, organ distribution, 139

False negative error rate
rat toxicity studies, coefficient of variation, 65
Flubendazole
benzimidazole-derivative, teratogenicity, 133
Food mutagen
heterocyclic amines, rat metabolism, acetylation, demethylation, 193
Furosemide
hepatotoxicity, glutathione, isolated hepatocytes, 149

Gentamicin
aminoglycoside antibiotics, developing kidney, 301
Glomerulus
nephrotoxicity, basement membranes, cation binding, metals, nickel, 1
Glutathione
furosemide, hepatotoxicity, isolated hepatocytes, 149
Glycol ethers
alkoxyacetic acids, testis, spermatocyte, 17
Guinea pigs
ovalbumin, isocyanates, pulmonary hypersensitivity, 93

Hamsters
diethylnitrosamine, *O*^{6}-ethylguanine, pulmonary cells, 289
Hepatotoxicity
dimethylformamide, solvent, 231
Hepatotoxicity
furosemide, glutathione, isolated hepatocytes, 149
Heterocyclic amines
food mutagen, rat metabolism, acetylation, demethylation, 193
2,5 Hexanedione
in vitro studies, human melanoma, morphologic differentiation, 269
Human melanoma
2,5 hexanedione, in vitro studies, morphologic differentiation, 269
Humoral immune response
O,S,S,-trimethyl phosphorodithioate, immunomodulation, cell-mediated immune response, 201

Iminium ion
bioactivation of MPTP, mutagenicity, 173
Immunomodulation
O,S,S-trimethyl phosphorodithioate, cell-mediated immune response, humoral immune response, 201
Immunosuppression
aflatoxin B_1, immunotoxicity, lymphocyte proliferation, lymphocyte cultures, 123
Immunotoxicity
aflatoxin B_1, lymphocyte proliferation, immunosuppression, lymphocyte cultures, 123
Inducers
alkylformamides, differentiation, 239
Induction
cytochrome *P*-450, catalyzed activities, polychlorinated biphenyls, benzo[*a*]-pyrene, mouse lung, mouse liver, 315
In vitro studies
2,5 hexanedione, human melanoma, morphologic differentiation, 269
Isocyanates
ovalbumin, pulmonary hypersensitivity, guinea pigs, 93
Isolated hepatocytes
furosemide, hepatotoxicity, glutathione, 149

Lead poisoning
cardiovascular system, carotid sinus, rats, 161
Lethal
T2 toxin, toxicity, mycotoxin, trichothecene, 31

Leukemia P 388
N-methylformamide, sodium ascorbate, menadione sodium bisulfite, pyridoxal hydrochloride, diminished toxicity, chemotherapy, M 5076 sarcoma, 183
L-T_3 treatment
brain Na^+, K^+-ATPase, mature rat, 75
Lymphocyte cultures
aflatoxin B_1, immunotoxicity, lymphocyte proliferation, immunosuppression, 123
Lymphocyte proliferation
aflatoxin B_1, immunotoxicity, immunosuppression, lymphoctye cultures, 123

Mature rat
L-T_3 treatment, brain Na^+, K^+-ATPase, 75
Menadione sodium bisulfite
N-methylformamide, sodium ascorbate, pyridoxal hydrochloride, diminished toxicity, chemotherapy, leukemia, P 388, M 5076 sarcoma, 183
Metabolism
butylated hydroxyanisole (BHA), rat, excretion, organ distribution, 139
Metallothionein
ascorbic acid, zinc, acute cadmium toxicity, mouse, 251
Metals
nephrotoxicity, glomerulus, basement membranes, cation binding, nickel, 1
N-Methylformamide
sodium ascorbate, menadione sodium bisulfite, pyridoxal hydrochloride, diminished toxicity, chemotherapy. leukemia P 388, M 5076 sarcoma, 183
Morphologic differentiation
2,5 hexanedione, in vitro studies, human melanoma, 269
Mouse
ascorbic acid, zinc, metallothionein, acute cadmium toxicity, 251
Mouse liver
cytochrome *P*-450, induction, catalyzed activities, polychlorinated biphenyls, benzo[*a*]pyrene, mouse lung, 316
Mouse lung
cytochrome *P*-450, induction, catalyzed activities, polychlorinated biphenyls, benzo[*a*]pyrene, mouse liver, 315

M 5076 sarcoma
N-methylformamide, sodium ascorbate, menadione sodium bisulfite, pyridoxal hydrochloride, diminished toxicity, chemotherapy, leukemia P 388, 183
Multi-generation
tridiphane, reproduction, rat, 325
Mutagenicity
bioactivation of MPTP, iminium ion, 173
Mycotoxin
T2 toxin, toxicity, lethal, trichothecene, 31

Neonatal
renal function, developmental toxicity, rat, chlorambucil, 51
Nephrotoxicity
glomerulus, basement membranes, cation binding, metals, nickel, 1
Neurotoxicity of silver
volumetry, Timm-stained rat hippocampus, 261
Nickel
nephrotoxicity, glomerulus, basement membranes, cation binding, metals, 1
Nitrosation
butylated hydroxyanisole, *N*-nitrosodi-*n*-butylamine, rat, 217
N-nitrosodi-*n*-butylamine
butylated hydroxyanisole, nitrosation, rat, 217

Organ distribution
metabolism, butylated hydroxyanisole (BHA), rat excretion, 139
Ovalbumin
isocyanates, pulmonary hypersensitivity, guinea pigs, 93

Polychlorinated biphenyls
cytochrome *P*-450, induction, catalyzed activities, benzo[*a*]pyrene, mouse lung, mouse liver, 315
Pulmonary cells
diethylnitrosamine, O^6-ethylguanine, hamsters, 289
Pulmonary hypersensitivity, isocyanates, guinea pigs, 93
Pyridoxal hydrochloride
N-methylformamide, sodium ascorbate, menadione sodium bisulfite, diminished toxicity, chemotherapy, leukemia P 388, M 5076 sarcoma, 183

Rat
butylated hydroxyanisole, *N*-nitrosodi-*n*-butylamine, nitrosation, 217
Rat
metabolism, butylated hydroxyanisole (BHA), excretion, organ distribution, 139
Rat metabolism
food mutagen, heterocyclic amines, acetylation, demethylation, 193
Rat
renal function, developmental toxicity, neonatal, chlorambucil, 51
Rats
lead poisoning, cardiovascular system, carotid sinus, 161
Rat toxicity studies
coefficient of variation, false negative error rate, 65
Rat
tridiphane, reproduction, multi-generation, 325
Renal function
developmental toxicity, rat, neonatal, chlorambucil, 51
Reproduction
tridiphane, rat, multi-generation, 325

Sodium ascorbate
N-methylformamide, menadione sodium bisulfite, pyridoxal hydrochloride, diminished toxicity, chemotherapy, leukemia P 388, M 5076 sarcoma, 183
Solvent
dimethylformamide, hepatotoxicity, 231
Spermatocyte
glycol ethers, alkoxyacetic acids, testis, 17

Teratogenicity
flubendazole, benzimidazole-derivative, 133
Teratogenicity
triclabendazole, benzimidazole derivative, 283
Testis
glycol ethers, alkoxyacetic acids, spermatocyte, 17
Timm-stained rat hippocampus
neurotoxicity of silver, volumetry, 261
Toxicity
T2 toxin, lethal, mycotoxin, trichothecene, 31
Trichothecene
T2 toxin, toxicity, lethal, mycotoxin, 31
Triclabendazole
benzimidazole-derivative, teratogenicity, 283
Tridiphane
reproduction, rat, multi-generation, 325
Trimethylamine
dimethylamine, 117
O,S,S,-trimethyl phosphorodithioate
immunomodulation, cell-mediated immune response, humoral immune response, 201
T2 toxin
toxicity, lethal, mycotoxin, trichothecene, 31

Volumetry
neurotoxicity of silver, Timm-stained rat hippocampus, 261

Zinc
ascorbic acid, metallothionein, acute cadmium toxicity, mouse, 251

Toxicology, 43 (1987) 345–346
Elsevier Scientific Publishers Ireland Ltd.

TOXICOLOGY

CONTENTS

Volume 43 (1987)

Interaction of toxic cations with the glomerulus: binding of Ni to purified glomerular basement membrane (**Nickel binds with high affinity to the anionic glycosaminoglycan sites of glomerular basement membrane**)
by D.M. Templeton (Toronto, Canada) 1–15

Comparison of the in vivo and in vitro testicular effects produced by methoxy-, ethoxy- and *N*-butoxy acetic acids in the rat (**Testicular toxicity of these metabolites of alkoxylethanol solvents decreases with increasing chain length, in vivo and in vitro**)
by P.M.D. Foster, S.C. Lloyd and D.M. Blackburn (Cheshire, U.K.) 17–30

Acute toxicity of T2 toxin in rats, mice, guinea pigs, and pigeons (**The fungal toxin causes a number of haematological, lymphoid organ and intestinal changes**)
by S. Fairhurst, T.C. Marrs, H.C. Parker, J.W. Scawin and D.W. Swanston (Salisbury, U.K.) 31–49

Critical prenatal periods for chlorambucil-induced functional alterations of the rat kidney (**The critical period for the induction of renal defects and hypoplasia lies on day 11 of gestation**) . . . . . .
by R.J. Kavlock, B.F. Rehnberg and E.H. Rogers (Research Triangle Park, NC) 51–64

The chances of false negative results in conventional toxicology studies with rats (**The probability of detecting a significant effect in given parameters is investigated**)
by D.O. Chanter, M.G. Tuck and D.W. Coombs (Cambridge, U.K.) 65–74

Studies on the effect of chronic L-triiodothyronine (T_3) treatment on brain NA^+,K^+-ATPase activity in the mature rat (**After 2 weeks of 5 mg/kg T_3 orally both molecular forms of brain ATPase are moderately increased**)
by C.K. Atterwill, C.G. Brown and P. Collins (Herts, U.K.) 75–91

Guinea pig pulmonary response to sensitization by five preformed monoisocyanate-ovalbumin conjugates (**Two monoisocyanates increase respiratory sensitivity while other do not**)
by J. de Ceaurriz, P. Ducos, J.-C. Micillino, R. Gaudin and C. Cavelier (Vandoeuvre, France) 93–101

Editorial Acknowledgement 103–106

Book Reviews 107–109

Contents of journals relating to Toxicology 111–115

The relative importance of N-oxidation and N-demethylation in the metabolism of trimethylamine in man (**N-oxidation is by far the most important metabolic pathway**)
by M. Al-Waiz, S.C. Mitchell, J.R. Idle and R.L. Smith (London, U.K.) . . . 117–121

Studies of immune function of CD-1 mice exposed to aflatoxin B_1 (**Aflatoxin suppresses B- and T-cell functions, with a greater effect on T-cells**)
by R.V. Reddy, M.J. Taylor and R.P. Sharma (Logan, UT) 123–132

Teratogenicity of flubendazole in rats (**Flubendazole produces a variety of fetal malformations**)
by H. Yoshimura (Tokyo, Japan) . . . . . 133—138
Metabolism of 2- and 3-*tert*-butyl-4-hydroxyanisole (2- and 3-BHA) in the rat (I): excretion of BHA in urine, feces and expired air and distribution of BHA in the main organs (**Excretion of BHA is rapid, 4-O-methyl demethylation occurs and the demethylated methyl group shows a non-specific distribution**)
by M. Hirose, A. Hagiwara, K. Inoue, T. Sakata, N. Ito, H. Kaneko, A. Yoshitake and J. Miyamoto (Nagoya and Hyogo, Japan). . . . . 139—147
Furosemide toxicity in isolated mouse hepatocyte suspensions (**Furosemide-induced cytoplasmic and cell surface lesions in vitro are similar to in vivo changes and glutathione depletion may be important**)
by T.E. Massey, R.M. Walker, T.F. McElligott and W.J. Racz (Ontario, Canada). . . . . 149—160
Carotid sinus reflexes in rats given small doses of lead (**Low level lead poisoning changes blood pressure and heart rate and increases the sensitivity of muscarinic receptors to blockage**)
by A. Skoczyńska, J. Szechiński, W. Juzwa, R. Smolik and F.J. Běhal (Wroclaw and Gdansk, Poland and Lubbock, TX) . . . . . 161—171
Mutagenicity of MPTP (1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine) and its metabolites (**MAO-catalyzed oxidation to a reactive dihydropyridinium species ($MPDP^+$) yields a mutagenic product**)
by J.R. Cashman (San Francisco, CA) . . . . . 173—182
The influence of sodium ascorbate, menadione sodium bisulfite or pyridoxal hydrochloride on the toxic and antineoplastic action of *N*-methylformamide in P 388 leukemia or M 5076 sarcoma in mice (**The toxic and antineoplastic actions of *N*-methylformamide can be moderately altered**)
by H. Osswald, R. Herrmann and M. Youssef (Heidelberg and Berlin, (F.R.G.). . . . . 183—191
Identification of the cooked food mutagen 2-amino-3-methylimidazo[4,5-*f*]-quinoline (IQ) and its N-acetylated and 3-N-demethylated metabolites in rat urine (**The major metabolites are identified in rat urine**)
by J.-C. Peleran, D. Rao and G.F. Bories (Toulouse Cedex, France). . . . . 193—199
Effects of *O,S,S*-trimethyl phosphorodithioate on immune function (**OSS-TMP is not an immunosuppressive agent**)
by K.E. Rodgers, N. Leung, C.F. Ware and T. Imamura (Riverside, CA) 201—216
Effect of butylated hydroxyanisole on in vitro and in vivo nitrosation of dibutylamine (**While BHA inhibits nitrosamine formation in vitro it does not do so in vivo**)
by L. Airoldi, R. Pastorelli, A. Macrì, M. Bonfanti and R. Fanelli (Milan, Italy) . . . . . 217—225
Contents of journals relating to Toxicology . . . . . 227—228
Announcements . . . . . 229—230

Review Paper
Dimethylformamide (DMF) hepatotoxicity (**Signs of DMF intoxication in humans are described**)
by V. Scailteur and R.R. Lauwerys (Brussels, Belgium). . . . . 231—238
Alkylformamides as inducers of tumour cell differentiation — A mini-review (**There seems to be a relationship between molecular weight and effect**)
by. S.P. Langdon and J.A. Hickman (Birmingham, U.K.). . . . . 239—249

Research Papers
Induced synthesis of metallothionein by ascorbic acid in mouse liver (**Pre-**

injection of mice with L-ascorbic acid protects against a lethal dose of cadmium)
by S. Onosaka, D. Kawakami, K.-S. Min, K. Oo-Ishi and K. Tanaka (Kobe, Japan) . . . . . 251—259
A quantitative evaluation of the neurotoxic effect of silver on the volumes of the components of the developing rat hippocampus **(A tissue volumetric method shows that silver affects only the pyramidal cells of neonatal hippocampus)**
by J. Rungby, L. Slomianka, G. Danscher, A.H. Andersen and M.J. West (Aarhus, Denmark) . . . . . 261—268
In vitro effects of 2,5 hexanedione on a melanoma cell line: A morphological study **(The solvent induces cytotoxicity in cell culture)**
by W. Malorni, G. Formisano and A. Molinari (Rome, Italy) . . . . . 269—282
Teratogenic evaluation of triclabendazole in rats **(No evidence was found for embryocidal or teratogenic effects)**
by H. Yoshimura (Tokyo, Japan) . . . . . 283—287
Formation and accumulation of O^6-ethylguanine in DNA of enriched populations of Clara cells, alveolar type II cells, and macrophages of hamsters exposed to diethylnitrosamine **(O^6-ethylguanine accumulates in Clara cells)**
by A.T. Fong and R.E. Rasmussen (Irvine, CA) . . . . . 289—299
Effects of prenatal and postnatal exposure to gentamicin on renal differentiation in the rat **(Gentamicin inhibits the development of kidney function)**
by T. Gilbert, M. Lelievre-Pegorier, R. Malienou, A. Meulemans and C. Merlet-Benichou (Paris, France) . . . . . 301—313
Differential induction of cytochrome *P*-450 catalyzed activities by polychlorinated biphenyls and benzo[*a*]pyrene in B6C3F$_1$ mouse liver and lung **(Different cytochrome *P*-450 isozymes are responsible for monooxygenase and nitroreductase activities and route of administration is important in expression of activities)**
by C.E. Mitchell, J.P. Fischer and A.R. Dahl (Albuquerque, NM) . . . . . 315—323
Effect of tridiphane on reproductive parameters in Fischer 344 rats **(No consistent adverse effects on reproduction, fertility neonatal survival or growth were seen)**
by J.A. John-Greene, T.K. Byrd, B.H. Scortichini, J.T. Young and K.S. Rao (Research Triangle Park, NC, Midland, MI and Freeport, TX) . . . . . 325—335
Contents of journals relating to Toxicology . . . . . 337—338
Announcements . . . . . 339—340
